- Educational Centers & Embassies
- Public transportation
- Other Indoor Installations

Technical Specifications:

Materials	304 Grade Stainless steel OR Mild Steel
Power Requirements	220 – 240 VAC – 50 Hz
Driver Motor	DC Brushless Motor
Channel Width	500 – 550 mm
Opening Speed	1s (Adjustable)
Working Temperature	30°C To 70 °C
Control Panel	PLC Based
Working Humidity	0% ~ 95%
Recommended Installation	Indoor & Outdoor

Model & Designs:

Mode of operations:

- Flap-Mex Standard
- Flap-Mex (Single & Multiple Lane)

Installation & Maintenance:

Delivery	Fully assembled / Kit Form
Site Preparation	Flat & Level finish floor +/- 0.2"
Bolting depth	MIN 3.9"

- ✓ The installation base must be solid to ensure that the expansion screws are well mounted to fix the devices
- ✓ If the flap barrier is close to the wall a space of 100mm distance between the Unit and the Wall should be reserved in order to open the cover and change the setting.
- ✓ The Flap Barrier units do not cover wide space so a multiple lane setup can be installed in a narrow corridor.

## Drawings:

1. Flap Barriers - Flap-Mex
2. Material: 304 Grade Stainless Steel
3. Passage Width 500-550 mm
4. 100mm Space Between Unit & Wall
